

HARPER GARCIA

Junior Software Engineer | Web & Mobile Applications

📞 +1-(234)-555-1234 @ Email 🔗 linkedin.com 📍 San Antonio, Texas

SUMMARY

Enthusiastic software engineer offering two years of experience in software development, with a strong foundation in Java and Python. Recognized for leveraging effective teamwork to enhance software functionality, boosting user engagement by 15%. Adept at collaborating on high-impact projects, including a cloud-based fintech application that processed over 500 transactions daily.

SKILLS

Java Python HTML/CSS JavaScript Git AWS

EXPERIENCE

01/2024 - Present

Austin, TX

Junior Software Engineer

Dynamic Minds Systems

- Collaborated with a team of senior developers to enhance a healthcare application, improving system response time by 30% and supporting efficiency.
- Assisted in integrating AWS cloud services for scalable storage solutions, significantly reducing data retrieval time by 40%.
- Contributed to the implementation of a validation procedure, resulting in a 25% decrease in software errors during the development cycle.
- Engaged in code reviews weekly, ensuring adherence to coding standards and enhancing overall code maintainability.
- Communicated effectively within interdisciplinary teams, presenting complex technical information to non-technical stakeholders, fostering a collaborative work environment.

06/2023 - 12/2023

Houston, TX

Software Development Intern

Streamline Solutions

- Developed a frontend user interface using HTML, CSS, and JavaScript, enhancing user experiences and increasing site visit duration by 20%.
- Assisted in the creation of testing scripts, helping identify critical bugs and reducing debugging time by 15%.
- Participated in Agile development sprints, contributing to the timely delivery of a major project on schedule and under budget.
- Leveraged problem-solving skills to support development staff, successfully resolving 95% of reported issues within the first 24 hours.

VOLUNTEERING

Volunteer Coding Instructor

Code Up San Antonio

📅 02/2023 - Present

Taught basic programming and web development to underprivileged youth, fostering STEM interest.

- Designed and delivered weekly coding classes, customizing lesson plans to fit different learning paces and styles.
- Organized a community coding hackathon, engaging 50+ participants and sparking enthusiasm for technology careers.

EDUCATION

01/2019 - 01/2022

San Antonio, TX

Bachelor of Science in Computer Science

The University of Texas at San Antonio

STRENGTHS

Analytical Problem Solving

Developed solutions for complex software issues, leading to a 25% reduction in critical bugs.

Effective Communication

Presented technical workshops to junior members, improving team coding efficiency by 15%.

Team Collaboration

Effectively worked within multiple cross-functional teams, successfully launching three projects with high client satisfaction.

INTERESTS

Coding and Software Development

Enthusiastic about learning new programming languages and frameworks, attending hackathons, and contributing to open-source projects.

Music Production

Enjoy creating and producing music in home studio setups, combining technology with creativity.

Technology in Healthcare

Keen interest in how technology can innovate and improve healthcare solutions and patient care effectiveness.
